

# Multilingual Legal Query System: Technical Report

---

## Executive Summary

The Multilingual Legal Query System is an advanced RAG platform for Indian Law. It enables users to query a localized database of Acts in 14 regional languages, providing high-precision, well-cited answers.

## Technology Stack

- LLM Reasoning: Groq Engine (Llama-3.3-70B)
- Embedding Engine: law-ai/InLegalBERT
- Vector Storage: ChromaDB (Persistent)
- Frontend/Backend: React.js, Node.js (Express), Python (Flask)

## Core Features

1. Multilingual Support: Full support for 14 Indian languages via LLM Translation Bridge.
2. InLegalBERT: Domain-trained embeddings for superior legal retrieval.
3. Intent-Pivoting: Metadata-driven force-retrieval for high-priority Acts.
4. Dynamic Scraper: Automated searching and ingestion from IndiaCode portal.

## Data Pipeline & Coverage

The system indexes over 6,700 legal chunks including the Constitution of India, CGST Act, CPC 1908, POCSO Act, and the 2023 Criminal Laws (BNS).
